The value of the Vessels and the total price for the construction of the Vessels is approximately US\$146 million (equivalent to about HK\$1,138.8 million) (representing approximately 17.5% of the Company’s net tangible assets as at 31st December 2002).

Finance Terms:

The Company is presently arranging finance of the Vessels and expects that finance for approximately 80% of the purchase price of each Vessel, guaranteed by the Company, will be finalised in the near future with the balance of the purchase price to be funded from internal resources. Should such finance not be arranged, the full purchase price of each Vessel would come from internal resources.

Contract Terms:

The terms of the Contracts were determined on an arm’s length basis and on normal commercial terms (based on price comparable to market price (as published by brokers), payment terms and delivery dates that meets Company’s requirement and agreed between a

willing buyer and a willing seller) and the directors of the Company, including the independent non-executive directors (the “Directors”) consider them to be fair and reasonable and to be in the interests of the Company based on their experience in the container shipping industry. The contract price of each Vessel is payable in four instalments. The first instalment in cash is payable on signing of the Contract; the second instalment in cash is payable within twelve months of signing the Contract; the third instalment in cash is payable upon keel laying of each Vessel and the fourth instalment in cash is payable upon delivery of each Vessel. The Vessels are expected to be delivered on or before 31st May 2006 and 31st July 2006 respectively.

Group Information:

The principal business of the Company and its subsidiaries (the “Group”) is international transportation & logistics and the Contracts have been entered into for the purposes of improving the quality of service which the Group provides to its customers. It is the view of the Directors that ownership of the Vessels will improve both the operating efficiency and profitability of the Group. The Group’s fixed assets will increase following the delivery of the Vessels, whilst current assets will decrease and long-term liabilities will increase depending on the proportion of the purchase price funded from internal resources and external finance.

For the purposes of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, the construction of the Vessels constitutes a discloseable transaction for the Company.

A circular giving further details of the transaction will be despatched to the shareholders of the Company, for their information, in due course.
